

Our most comprehensive Tier. Here you will benefit from everything listed in Tiers 2 and 3 plus the additional:

- We train a number of your staff members on becoming Critical Incident Commanders (CIC). This gives those members of staff the knowledge, ability and confidence to make critical decisions in fast paced, high stress environments. By appointing a CIC during an incident, it allows for a faster and safer resolution and removes the likelihood of independent action, which will only complicate and confuse an already high stress environment.
- These staff members will go on to receive training and accreditation in Immediate First Aid (IFA). This is an enhanced first aid course covering prioritising casualties, nesting to assist first responders and the application of good quality, effective life saving care during the platinum 15 minutes and even into the golden hour of life support. We train 1 member of staff for every 10 but with a minimum of 3 in the school to cover contingencies.
- Post Incident Support. We will have a member of the SRS team available for your school post incident. This allows for immediate action, review and changes to be made, reassuring parents, staff and students. This also will show positive action has been taken, in anticipation of an OFSTED inspection.
- 10% off of our S.E.C.U.R.E bags for your school.

Tier 2 is a good starting point for those schools who are serious about maximising the safety of their students and staff. You get everything in the Tier 3 package but additionally the following;

- We will run a practice emergency drill in your school and cover a thorough post incident procedure, identifying key learning points, and things which have gone well. Scenario training is pivotal in making the drills familiar and second nature.
- We will also create a bespoke training video for your school. This will cover all the emergency procedures as well as contingencies. The video will be valid for 12 months and can be shown to new members of staff, or at regular intervals to refresh memories and reinforce learning.

Tier 3 gives you a full S.E.C.U.R.E review and assessment of your schools current operating procedures, plans and contingencies. We will then create a bespoke set of actions for your school in order to become compliant with OFSTED requirements and much more. We will take your school and make it the safest it possibly can be. You will receive an electronic and hard copy of all the new SOPs and plans, covering contingencies and drills.

Your bespoke S.E.C.U.R.E assessment and actions will be valid for 12 months, in line with the Department for Educations recommendations. However, we believe 12 months is too long to wait and therefore at around the 6 month mark, we will conduct a full review of everything that has been implemented to not only make sure you are still OFSTED compliant, but above and beyond.
